TECHNICAL SKILLS

- Production Support & Incident Management (L2)
- Root Cause Analysis & Debugging
- Python & Pandas for Data Analysis
- PL-SQL Query Writing & Optimization
- Database Troubleshooting & Reporting
- .NET & C#
- ITIL Processes
- Technical Documentation & Reporting
- HTML, CSS

KUNDAN JAISWAL

SOFTWARE ENGINEER | PRODUCTION SUPPORT ENGINEER (L2)

Results-driven IT professional with 4+ years of experience in production support, incident management, and application monitoring, currently working as an L2 Production Support Engineer. Skilled in root cause analysis, SQL/PL-SQL query development, and building Python (Pandas) based scripts for data analysis and reporting. Strong background in .NET, C#, and ITIL processes, with a track record of resolving complex, business-critical issues and improving system reliability. Seeking to leverage strong debugging, database, and analytical skills in a Production Support L2 or PL/SQL Developer role.

WORK EXPERIENCE

SOFTWARE ENGINEER (L2 PRODUCTION SUPPORT)

Cognizant, Navi Mumbai | Apr 2024 - Present

Working as an L2 Production Support Engineer, performing in-depth root cause analysis and resolving escalated incidents for enterprise applications. Writing and optimizing advanced PL-SQL queries to extract data, build reports, and investigate production issues. Using Python and Pandas to automate data analysis, build reporting scripts, and speed up recurring troubleshooting tasks. Debugging application and database issues, coordinating fixes with development teams, and validating resolutions before closure. Monitoring and managing incident tickets through ITSM tools, ensuring timely resolution within SLA. Collaborating with L1 and L3 teams to triage, escalate, and resolve complex incidents. Assisting with application deployment, deployment verification, and post-deployment troubleshooting. Creating technical documentation and knowledge base articles covering RCA findings, fixes, and reusable queries.

JUNIOR SOFTWARE ENGINEER

Cognizant, Mumbai | Dec 2021 - Mar 2024

Provided L1 technical support for business-critical applications, keeping systems available and users unblocked day to day. Managed and resolved incident tickets within SLA, escalating complex issues to senior teams when needed. Wrote SQL queries to investigate and fix database-related issues and monitored application performance to catch and address bottlenecks early.

INTERN - DATA CURATOR & REVIEWER

Enfuse Analytics Solutions, Mumbai | Apr 2021 - Nov 2021

Processed, cleaned, and validated large datasets to ensure data accuracy, consistency, and integrity across sources. Performed data classification, quality assurance, and error analysis to improve dataset reliability and support data-driven business insights.

INTERN - TAGGER

Quantiphi Analytics Solution Private Limited, Mumbai | Nov 2019 - Mar 2021

Annotated, labelled, and categorized large-scale datasets to build high-quality training data for machine learning and AI models, ensuring labelling accuracy, consistency, and adherence to project quality guidelines.

EDUCATION

BACHELOR OF ENGINEERING (B.E), INFORMATION TECHNOLOGY

Shree L R Tiwari College of Engineering, Mumbai | 2017 - 2021

CGPA: 7.04 / 10

SENIOR SECONDARY (XII), MAHARASHTRA

Thakur College of Science and Commerce | 2017

Percentage: 63.38%

SECONDARY (X), MAHARASHTRA

Guru Nanak Mission High School | 2015

Percentage: 80.60%

PROJECTS

E-COMMERCE BOOK STALL: A DIGITAL MARKETPLACE FOR BOOK LOVERS

Aug 2023 - Sep 2023

Built an online bookstore website where users can sign up, browse books by genre, see clear prices with bulk discounts, add books to a cart, and check out. An admin panel lets the owner manage book listings, orders, and pricing.

ADVANCED PARKING SYSTEM

Apr 2022 - Jun 2022

Built a web application for managing parking, using .NET Core and Entity Framework. Users can register and log in securely, book a parking slot for a chosen date and time, and see in real time which slots are free for their type of vehicle.

LIVE FACIAL RECOGNITION SYSTEM USING MATLAB

Jul 2020 - May 2021

Built a MATLAB application that recognizes people's faces in real time using a webcam. The system captures a live video feed, compares each face against a stored database of registered users, and identifies who the person is. A simple graphical interface displays whether the face was recognized along with the match accuracy.

IOT MINI PROJECT - SECRET KNOCK DOOR LOCKING SYSTEM

Aug 2019 - Oct 2019

Built an Arduino-based smart lock that opens the door when it detects a specific secret knock pattern. A sensor picks up the knocks, the program checks whether they match the saved pattern, and the lock opens — with light and sound signals to confirm the result.

MINI PROJECT - BASIC USER INTERFACE FOR AN EXAMINATION SYSTEM

Mar 2019 - Apr 2019

Designed the user interface for a web-based online exam system. It includes a login and registration screen and a dashboard where students can see upcoming exams, check past results, and update their profile settings.
